FOR PERMANENT LAWNS OF PUTTING GREEN TEXTURE

HOW TO MAKE A LAWN

The ground should be thoroughly prepared; that is, the soil should be fertilized, then turned over to a depth of 6 inches and pulverized. Sow good seed (which is very essential) roll the ground and cross roll in order to press the seed firmly into the soil. The proper time to sow grass seed depends upon the latitude. In the central and eastern states seed may be sown from March 1st to the end of June. Seed may be sown in the fall, from the first part of August to the end of October. Sow, if possible, when the ground is moist. For seeding a new lawn use 150 pounds to the acre.

KENNEDY'S BENTURF

Reg. U. S. Pat. Off.

LAWN GRASS SEED MIXTURE

(Bent Formula)

The popularity of golf in recent years has made comparison of lawns and putting greens an easy matter. One hardly expects his lawn to look as perfect as a putting green, but this is possible if sown with Kennedy's Benturf Lawn Grass Seed Mixture. With reasonable preparation and care excellent results have been accomplished with our Kennedy's Benturf Lawn Grass Seed Mixture which contains a large amount of Bent seed. This makes a compact, rapid growth, forming a close sward withstanding wear and tear.

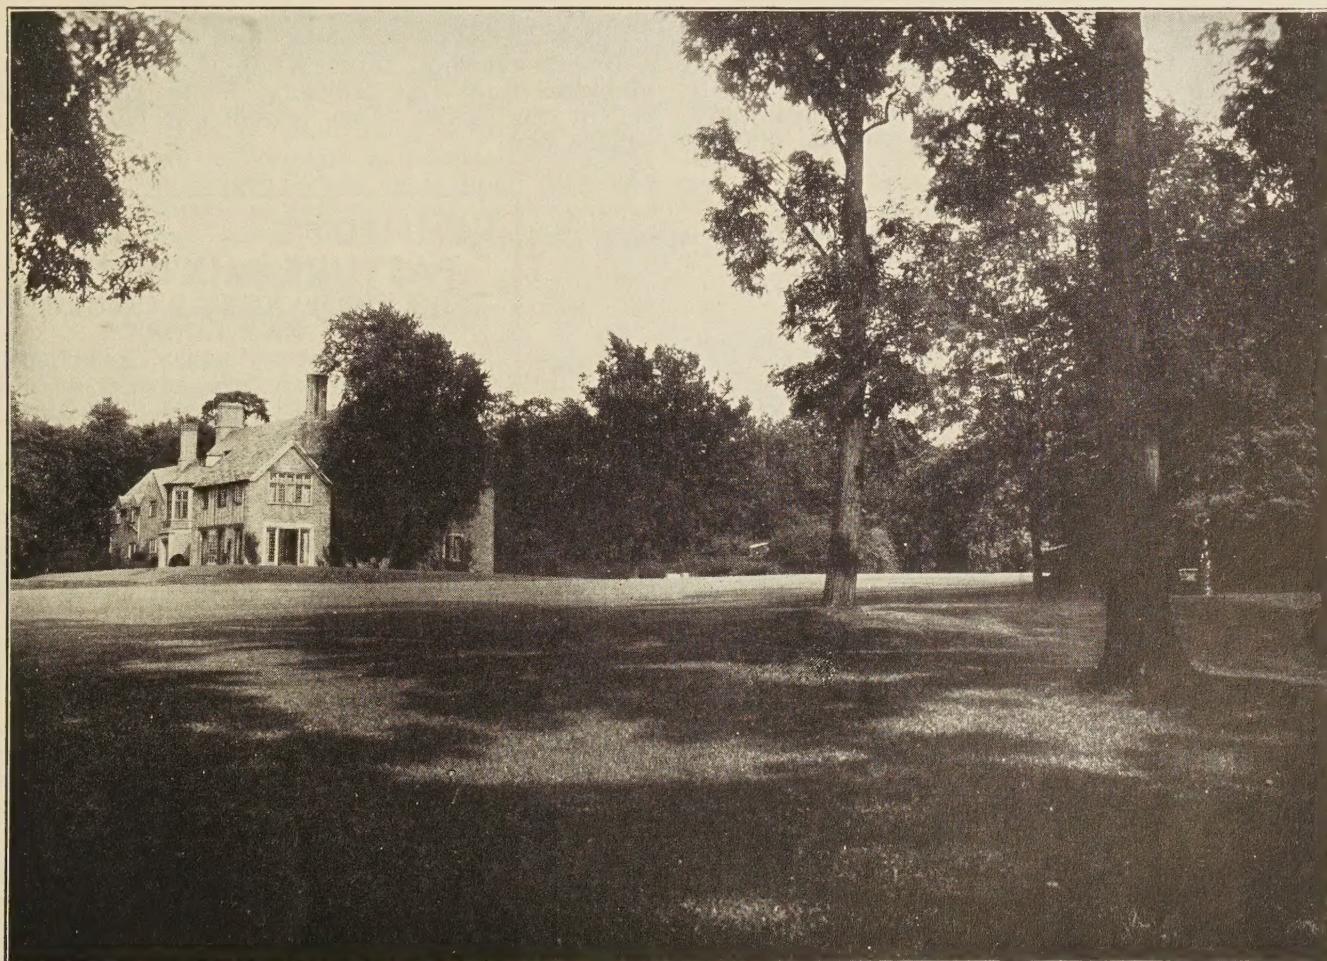

Lb. \$2.15, 25 lbs. \$50.00, 100 lbs. \$195.00

KENNEDY'S GREENTURF LAWN GRASS SEED MIXTURE

(Formerly Kennedy's Green Velvet)

This is the lawn grass seed mixture which for over 25 years has seeded many of the most beautiful lawns in America under the name of Kennedy's Green Velvet Lawn Grass Seed Mixture. Recently worthless mixtures bearing the trade name "Green Velvet" have been marketed to the confusion of our patrons. To avoid this confusion we have changed the name to KENNEDY'S GREENTURF LAWN GRASS SEED MIXTURE. The seed in this mixture is all recleaned and especially adapted to withstand the heat and drought of the summer. When properly sown and cared for GREENTURF will produce a beautiful green lawn the entire season.

Lb. \$1.95, 25 lbs. \$45.00, 100 lbs. \$175.00

Kennedy Kuality Lawn Grass Seed

LAWN GRASS SEED—Continued

KENNEDY'S KARPETURF LAWN GRASS SEED MIXTURE

This mixture is comprised of some of the quick germinating grasses as well as larger proportions of the permanent, deep rooted varieties. It has been tried in a great many sections of the country and has given excellent results where a quick cover was desired and has proven particularly adaptable for sowing on old lawns which have become shoddy and in need of renovating. Lb. \$1.75, 25 lbs. \$38.75, 100 lbs. \$150.00

KENNEDY'S RENOVATING MIXTURE

This mixture has been tried in a great many sections of the U. S. for the past few years. It contains grasses which grow especially well in light or sandy soil. Recommended for renovating lawns which have become bare in spots. Lb. \$1.10, 25 lbs. \$25.00, 100 lbs. \$95.00

KENNEDY'S TENNIS COURT MIXTURE

The hardiest and finest low-growing grasses are contained in this mixture. It produces a beautiful and lasting green turf calculated to withstand hard wear and tear.

25 lbs. \$48.75, 100 lbs. \$190.00

KENNEDY'S PUTTING GREEN MIXTURE

This mixture is made up of deep rooting permanent grasses with a view of forming a close turf which will stand being played on a great deal without showing any wear and tear.

25 lbs. \$48.75, 100 lbs. \$190.00

KENNEDY'S KWIKTURF LAWN GRASS SEED MIXTURE

Where a quick turf is desired which will remain green with a minimum of care and attention we recommend this mixture which is composed of deep rooting, strong growing grasses.

Lb. \$1.40, 25 lbs. \$31.25, 100 lbs. \$120.00

KENNEDY'S SHADETURF LAWN GRASS SEED MIXTURE

This is a mixture of extra fine grasses adapted for growing in the shade and under trees. We recommend the use of this mixture wherever other grasses, on account of shade, have failed to make a close sward.

Lb. \$2.10, 25 lbs. \$47.50, 100 lbs. \$185.00

KENNEDY'S TERRACE MIXTURE

A mixture of strong, deep-rooted grasses for banks and terraces. Although the grasses are strong and deep-rooted, they will produce a fine, green velvety surface, and also prevent washing away during heavy rains.

Lb. \$1.90, 25 lbs. \$42.50, 100 lbs. \$165.00

LAWN CLOVER—Dwarf White

The only variety suitable for lawns. Very dwarf and of a spreading habit. We advise sowing White Clover separately on account of the seed being much heavier than that of the finer grass seed. It has a tendency to work to the bottom of the receptacle it is being sown from and consequently the last part of the grass seed sown has a greater percentage of Clover than the first.

Lb. \$2.25

WILD WHITE CLOVER

Dwarf growing, thick White Clover which is more vigorous than the ordinary White Clover, and excellent for lawns. One pound will cover about 800 square feet.

Lb. \$2.85

KENNEDY'S PASTURE MIXTURE

FOR PERMANENT PASTURE AND
HAY CROPS

Our Permanent Pasture Grass Seed Mixtures contain only grasses most suitable for this purpose. The result of sowing Kennedy's Permanent Pasture Mixture is a successive growth of rich, succulent grasses from early spring until late fall.

We recommend, in good soil, sowing 80 lbs. per acre or in poor soil 100 lbs. per acre. We also suggest sowing an additional 10 lbs. of Red Clover, in either case, to the acre.

Permanent Pasture Grass Seed may be sown either spring or fall but we advise sowing Clover in the spring only.

When ordering state whether your soil is sand, clay, moist or dry so that the proper proportions of the various grasses may be used.

A—For Light Soil. Sow 100 lbs. per acre.
100 lbs. \$85.00

B—For Wet, Heavy Soil. Sow 100 lbs. per acre. 100 lbs. \$95.00

C—For Woodland Pastures. Sow 100 lbs. per acre. 100 lbs. \$95.00

SPRING CATALOG — PAGES 1 TO 15**

New strains and improvements over old favorites are continually introduced after thorough trials in the field. Our U. S. Department of Agriculture appropriates tremendous sums to breed in desired characteristics, or to develop something new. We are always on the alert to procure these items after careful trials. To continue to offer the old favorites results in a duplication and sometimes confusion for the gardener. As quantities are produced, and the price is in line, we therefore drop the older variety in any instance where the new introduction embodies all older features plus additional assets.

BEANS

Dwarf Green Podded

***COMMODORE.** Extra long, round podded, stringless beans. 6 to 7 inches in length. Well described as a dwarf Kentucky Wonder with all the good qualities of that variety. **Lb. \$1.25, 5 lbs. \$5.75**

CONTENDER. Resistant to Mosaic and powdery mildew. Pods are similar to Black Valentine Stringless 6 inches in length. A recent introduction. **Lb. 90c, 5 lbs. \$4.25**

THE PRINCE. A dwarf French Bean with immense, thick pods 1 to 12 in. in length and stringless, fine flavor and very prolific. Used extensively as a forcing Bean. **Pkt. 75c**

WADE. New introduction of the U.S.D.A. superior to "Topcrop" in color and tenderness of pod. Pods round, dark green, fleshy and fine flavor. **Lb. \$1.25, 5 lbs. \$5.75**

BEANS

Wax or Yellow Podded

CHEROKEE WAX. Black-seeded. Comparable to Black Valentine in shape and size. Semi-round with thick flesh and pods, straighter than most Wax varieties. Very prolific. **Lb. 95c, 5 lbs. \$4.50**

BEANS

Dwarf or Bush Lima

***EVERGREEN.** An entirely new bush Lima. Its great merit is in the color, shape and flavor of the Beans, about the size of Henderson's, but plump; green in both skin and Bean thus making an attractive appearance on the dinner table; gratifying to the taste and has the nutty Fordhook flavor. The good qualities are not lost in preparation, whether the Beans are used fresh, from the deep freezer or canned. Plants, pods and maturity are very much the same as standard small seeded bush Lima varieties. **Lb. \$1.25, 5 lbs. \$5.75**

***FORDHOOK 242.** 75 days. Wherever the regular Fordhook Bush Lima is adversely affected by hot summer weather, this new Fordhook 242 will give a heavy crop. It has large thick seedpods containing 3 or 4 Beans of choice quality. **Lb. 95c, 5 lbs. \$4.50**

BEANS—SHELL

DWARF HORTICULTURAL LONG POD. Large pods which at maturity are bright yellow streaked bright red. Vine dwarf bearing a heavy crop of beans. **Lb. \$1.25, 5 lbs. \$5.75**

BEANS—BROAD WINDSOR

FAVA. An improved Broad Windsor bean with straight pods about one foot long. This is near perfection. **Lb. \$1.25, 5 lbs. \$5.75**

BEANS—POLE Green Podded

ITALIAN POLE. Stringless, pole snap bean, large fleshy pods of distinct flavor. Considered by many to be the finest of all snap beans.

Lb. \$1.25, 5 lbs. \$5.75

*Adaptable for Deep Freezing.

BEETS

EARLY WONDER, GREEN TOP. Roots round, smooth, dark red with clear bright interior, sweet, tender. Tops erect, vigorous growth bright gray-green does not turn red at maturity.

Oz. 45c, 1/4 lb. \$1.30, lb. \$4.25

BROCCOLI

***DE CICCO.** An extremely early and uniform strain of the green Italian Broccoli. Heads medium size. Fine grained.

Pkt. 35c, 1/4 oz. \$2.00

BRUSSELS SPROUTS

CATSKILL. Reselected strain, dwarf with compact hard sprouts packed tightly on the stems. Matures a good crop in succession.

Pkt. 25c, oz. \$3.00

CABBAGE

BONANZA. Outstanding for its ability to produce a hard small head early in the season but can be grown to a 4 lb. head without loss of hardness and will not burst. Follows Early Jersey Wakefield.

Pkt. 25c, oz. \$1.00

CARROTS

IMPROVED IMPERATOR. Superior strain, reaching 10 inches in length on rich, soft ground. Give plenty of moisture to keep sweet, never allow to get dry. Make successive sowings every 3 weeks. This is the finest of the slender, smooth deep orange carrots.

Pkt. 25c, oz. 65c, 1/4 lb. \$2.00

CAULIFLOWER

IDEAL SNOWBALL. An excellent second early variety. It heads reliably under adverse conditions, especially heat. Fruit is white, heavy and solid, with an excellent flavor. Recommended for garden and market.

Pkt. \$1.00, 1/4 oz. \$5.00

CELERY

EMERSON PASCAL. 1952 introduction from Cornell. Uniform in plant type, erect habit of growth, deeply cut leaves, good flavor. A green strain, wilt resistant to early and late blight.

Pkt. 35c, oz. \$3.50

CORN, SWEET

Keep husk on the ears until ready to cook; serve immediately after cooking.

ACADIA. 75 days. A new early hybrid, superior in sweetness and flavor to any corn in its class. Matures with the extra early varieties. Ears as long as Marcross.

Lb. 95c, 5 lbs. \$4.50

GOLDEN JEWEL. 73 days—6-8 in. ears, 12 rowed, well filled ears. Produces in Marcross season, quality comparable to Carmelcross. Reported to have high seedling vigor, favoring a good stand when weather is cold and wet.

Lb. 95c, 5 lbs. \$4.50

HOOSIER GOLD. 79 days. New hybrid of great merit for earliness, quality and size. Produces a 10 to 14 rowed ear slightly earlier and larger than Carmelcross and equal to Golden Cross Bantam in tenderness and flavor. One week earlier than Golden Cross and 6 to 8 in. long.

Lb. 95c, 5 lbs. \$4.50

RELIANCE. 88-90 days. Late hybrid, very large cylindrical ears with 14-18 rows. 2 to 4 days later than Golden Cross Bantam and equally as good. 8 ft. tall. Matures unevenly making this a good long season variety. 7½ to 8½ inch ears. Lb. 95c, 5 lbs. \$4.50

Exactly like White Midget in growth and habit except the cob is smaller and the kernels sweeter; in fact, anyone who has eaten Mason's Golden Midget acclaims it to be the sweetest Corn they have ever tasted. It grows on miniature plants rarely exceeding a height of 3½ feet and can be sown in rows, thinning the plants out to 9 inches apart, allowing 18 to 24 inches between the rows. Each plant carries 3 to 5 ears about 4 inches long, maturing in 50 to 55 days. For a continuous supply, successive sowings should be made every 10 days until July 10th in the latitude of New York.

2½-oz. pkts. 75c, 3 pkts. \$2.00
CUCUMBERS

SURECROP (Hybrid). Disease resistant. Vigorous large leaved vines with an early crop of long dark green fruit. One of the best of the high yielding hybrids. About a week earlier than the standard varieties

Pkt. 25c, oz. \$1.00

LETTUCE

BIBB. The leaves are dark green and though the heads are small, every leaf is edible and unsurpassed in quality. Not recommended for growing in hot weather.

Pkt. 25c, oz. \$1.00

SALAD BOWL. Seed of "Salad Bowl" will be available for the first time in 1952. Oak-leaf type. Improved loose leaved variety with much divided leaves cut and scalloped at the edges. So much foliage is produced that the large rounded heads are well blanched in the interior.

Pkt. 25c, oz. \$1.00

SLOBOLT. Very long standing selection of the popular Grand Rapids. Large, loose leaves with excellent quality retained for a long period.

Pkt. 25c, oz. \$1.00

SUMMER TRIUMPH. Oak-Leaf type. Compact heads, very tender leaves of excellent flavor. A sure heading summer Lettuce.

Pkt. 25c, oz. \$1.00

MELON, MUSK

GRANITE STATE. Moderate sized vine. Early, oval, 5 to 6 inches long. Closely netted. Flesh light orange thick. Very fine flavor. Mildew resistant.

Pkt. 50c, oz. \$1.50

IROQUOIS. Improved Bender's Surprise, larger and better quality. Round to oval fruits, medium size with coarse netting. Flesh very thick deep orange and rates high in flavor and sweetness. Vines vigorous with good set of fruit. Resistant to fusarium wilt.

Pkt. 25c, oz. \$1.00

Tuberous Rooted Begonia—Camellia Type

BEGONIAS TUBEROUS ROOTED

Although there is much to be gained in early blooming by starting the tubers in pots indoors, the dormant bulbs may be planted 10 inches apart in the open ground during May with excellent results. They will thrive in partial shade. Planted on the north side of the house they will make a beautiful show and in places where hardly any other flower will bloom satisfactorily.

Kennedy Kwality Exhibition Gladiolus

Prize Winning Basket of Kennedy Kwality Gladiolus

In recent years there has been great improvement as to color and size of this wonderful flower, so in compiling our list, great care has been taken to select the best varieties in each color. Their long flowering season and stately habit together with their great variety of color and adaptability for all decorative purposes, command for them a prominent position in every garden. A succession of bloom may be had by planting the bulbs at intervals of two weeks, from April 15th to July 15th.

Due, no doubt, to scientific treatment of planting stock for years our Gladioli have always been free from thrip. As an added precaution and to be sure that bulbs supplied by us are absolutely free from this pest, we will also scientifically treat our bulbs again before shipment is made to our customers.

Inasmuch as thrip lives in the soil, as well as on the bulbs in storage, through the winter, it is imperative that our bulbs be planted on soil where Gladioli were not grown last year and not close to other Gladioli from other sources.

We guarantee our bulbs to be the largest size and well matured, which is absolutely essential for producing exhibition flowers.

Kennedy Kquality Hardy Lilies

Explanation: The numerals refer to the season of bloom, thus 6 would mean June; 7 July; 8 August.

The Lilies we offer are all perfectly hardy and will produce a quantity of beautiful flowers of various colors, which effect cannot be duplicated by any other flower. Lilies are very adaptable for herbaceous borders or for

planting among shrubbery. Bulbs should be planted at least twice their own depth and if the soil is heavy it is desirable to use a quantity of sand under the bulbs to provide drainage.

AURATUM (Golden Rayed Lily of Japan). White, studded with crimson spots, and through the center of each petal is a gold band; large and fragrant. (8).

Mammoth Bulbs.

Doz. \$20.00, 100 \$150.00

ESTATE. Pure white tube Lily to bloom in August, this American-grown Lily is ideal for the border or Lily group in the garden. For best results mulch lightly.
